Overview

Allergo Journal International (AeDA) and the Austrian Society for Applied Allergology and Clinical Immunology (ÖGAI). The journal is a forum for the communication of research in the various aspects of allergy (including clinical immunology and environmental medicine) and promotes German and Austrian allergy research. The aim of Allergo Journal International is to provide state of the art information for all medical and scientific disciplines that deal with allergic, immunological and environmental diseases. Allergo Journal International publishes original articles, reviews, short communications, case reports, and letters to the editor. The articles cover topics such as allergic, immunological and environmental diseases, the latest developments in diagnosis and therapy as well as current research work concerning antigens and allergens and aspects related to occupational and environmental medicine. In addition, it
